

Guidance IST HOME

1. Download the IST Home app from the Appstore or Google Play (This app is already used in municipal kindergartens and at SFO)
2. Log in with ID-Porten, select Indre Østfold municipality.

On this app, I will enter absences, publish information, important documents and weekly plans. There is also a chat function here. You are welcome to use this to give me information, but I do not receive notifications about messages that arrive here, if there are messages that are not urgent, you are welcome to use the chat function. I will go in and read messages every morning and after school.

Some features of the app:

The image shows three screenshots of the IST HOME app interface with blue callout boxes:

- Left screenshot (Meldinger):** A callout bubble says "Under messages you will find info and the chat button" pointing to a chat icon in the top right corner of the 'Meldinger' screen.
- Middle screenshot (Chat):** A callout bubble says "Tap this icon to create a chat with a teacher" pointing to a plus icon in the top right corner of the 'Chat' screen.
- Right screenshot (Innstillinger):** A callout bubble says "It is a good idea to enable notifications and remember me" pointing to the 'PÅ' (On) toggle for 'Varslinger' (Notifications) and the 'AV' (Off) toggle for 'Husk meg' (Remember me). Another callout bubble says "Change language here" pointing to the 'Velg språk' (Select language) option under the 'Språk' (Language) section.

3. To familiarize yourself with the app: Go to isthome.se and change the language to Norwegian (the flag in the right corner)

4. Click on "User guides" in the menu. Here you will find instructional videos for all functions in the app.
